## Summary

---

I am Shruti Ransing , A final year B.E computer Engineering Student who had a strong foundation in a Full stack Developer Web development with hands-on experience in building responsive and scalable web applications using MERN stack . My technical skills set includes HTML5, CSS3, JavaScript (ES6+), React.js for frontend development, and Node.js, Express.js with MongoDB for backend development.

[My Portfolio](#)

## PROJECTS

---

### ERP - Student management system ([www.unisphere.tech](http://www.unisphere.tech))

SEP 2025 - Present

Created an ERP-driven Student Management System with student/teacher dashboards, attendance & fee management, notice board, and performance tracking with real-time data sync.

Tech Stack: React-Vite, Node.js, Express.js, MongoDB

#### Joke App

Developed a fun web application using HTML, CSS, and JavaScript .Integrated a public Joke API to fetch and display random jokes dynamically.Implemented features like "Generate New Joke" button and responsive design for mobile and desktop.

#### Key Features included :

Focused on API handling, asynchronous programming (fetch/async-await), and DOM manipulation, Implemented Features like "Generate New Joke" button ". July 2025

**Tech Stack :** HTML,CSS,JavaScript.

### Weather App (<https://weatherappss.onrender.com>)

Developed a responsive weather application using React.js, featuring a user-friendly interface built with Material-UI. The app allows users to search for weather information by city name, fetching data from the OpenWeatherMap API.

July 2025

#### Key Features included :

Displays current weather metrics (temperature, feels like, humidity, min/max) with error handling for city not found, deployed on Render for high availability.

**Tech Stack :**React.js,CSS, OpenWeatherMap API.

## EDUCATION

---

### Navasahyadri Education Society's Group Of Institutions

Bachelor Of Engineering (CS) - 8.81

November 2022 - May 2026

## SKILLS

---

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js ,API Integrations

- Databases: MongoDB, SQL
- Frameworks/Libraries: Bootstrap, Material UI.
- Version Control: Git, GitHub
